2018 COLLECTION

MASONITE®

Open to extraordinary.

Open to
extraordinary™

Masonite is committed to delivering unsurpassed performance in interior and exterior doors and glass products. We want to provide not just a door, but a total experience, giving you a complete line of products, services and support tools designed around your success.

We are your leading source for the latest trend insights and design ideas, delivering distinctive door styles that complement any home and personal taste. From the classic lines of our Heritage Series™ collection to the wide open views of our VistaGrande® series, we offer the breadth of exterior door and glass options to meet any performance, material and design need, so you always have the right answer for your customers.

Every product we offer is the result of years of research, design, engineering and development that begins at the Masonite

Innovation Center in suburban Chicago, the largest facility of its kind in the industry. It is this dedication to a fully integrated design process that sets us apart from the competition and ensures every product we deliver lives up to our exacting standards for quality, consistency and craftsmanship.

YOUR TRUSTED PARTNER

Masonite is not just a trusted leader in exterior doors; we are a powerful partner who helps you elevate the role a door plays in your projects—creating more inspiring customer experiences and stronger business results.

- ▶ AvantGuard. offers a superior appearance by taking a cutting-edge approach to door design. Rather than simply applying stain over a fiberglass facing, a high-quality image is applied over a protective primer layer for an authentic, long-lasting finish.

- ▶ Featuring superior woodgrain texture, distinct raised mouldings and wider glass, Barrington. doors offer the ultimate in style and durability.

- ▶ *More Barrington. door options available, see page 12.

- ▶ VistaGrande. Flush-Glazed doors offer a wider viewing area and cleaner appearance over traditional glass inserts. Stile and rail features provide an authentic wood door look.

BELLEVILLE. SMOOTH DOORS

Two white doors are shown side-by-side. Each door has a large glass insert in the upper half, divided into a grid pattern by thin metal lines. A vertical metal handle is centered on each glass insert. Below the glass insert is a solid white rectangular panel with a recessed border.

Imagine a blind you don't have to dust or clean. Our blinds are built into efficient sealed units protected with tempered glass. A single touch easily opens/closes blinds for privacy and light exposure.

- ▶ All sizes feature raise, lower and tilt functionality
- ▶ Security channels provide full privacy preventing light gaps when closed (no side or bottom gaps)
- ▶ Tight fit of frame to glass, no large gaps
- ▶ Spacer bars not visible in sightline of frame

- ▶ Smoother, easier and more versatile dual mechanism operation
- ▶ 80" sidelite now available
- ▶ Tan slat mini blinds now available
- ▶ Soft coat LE option for ENERGY STAR compliance
- ▶ HVHZ Hurricane impact-rated mini blinds now available

STORM GUARD.

IMPACT-RATED DOORS

Masonite Storm Guard[®] doors are designed specifically for coastal area homeowners and comply with High-Velocity Hurricane Zones (HVHZ) or Wind-Borne Debris region (WBD) requirements. Choose from a variety of fiberglass and steel doors.

Living on the coast is one of life's luxuries. Upgrading home construction in areas prone to high winds and hurricanes provides peace of mind during times of severe weather activity. Masonite engineered Storm Guard[®] impact-rated smooth and textured fiberglass doors, featuring CoreShield[™] Technology and Masonite steel doors to meet strict building code requirements without compromising beauty. The Wind-Borne Debris Region and High-Velocity Hurricane Zones (HVHZ) have specific test requirements for doors.

- ▶ Florida Wind-Borne is defined as 140 mph winds or 130 mph within one mile of the coast
- ▶ HVHZ is specific to hurricane-rated winds in Florida's Dade and Broward counties

CORESHIELD[™] TECHNOLOGY

An additional layer of protection on Storm Guard[™] fiberglass doors that adds protection and meets the most stringent building codes

HURRICANE PRONE REGIONS

DESIGNATED ZONES

HVHZ High-Velocity Hurricane Zone

- Dade and Broward counties (FL)
- Doors required to meet Florida TAS
- 201 and 203 test standards
- Must comply with specific DP ratings in accordance

WBD Wind-Borne Debris Region

- 130 mph and within one mile of the coast
- Doors required to meet Florida ASTM
- E1886 and E1996 tests
- Designated areas where the basic wind speed is 140 mph or greater

Notes:

- Values are nominal design 3-second gust wind speeds in miles per hour (m/s) at 33 ft. (10m) above ground for Exposure C category.
- Linear interpolation between contours is permitted.
- Islands and coastal areas outside the last contour shall use the last wind speed contour of the coastal area.
- Mountainous terrain, gorges, ocean promontories and special wind regions shall be examined for unusual wind conditions.
- Wind speeds correspond to approximately a 7% probability of exceedance in 50 years (Annual Exceedance Probability = 0.00143, MRI = 700 years).

Fast-Frame.

ADJUSTABLE KERFED STEEL REPLACEMENT FRAMES

The Ultimate Adjustable Kerfed Steel Door Frame

Fast-Frame's advanced design adds a new dimension of flexibility and durability to Masonite's steel entry door line. Developed and manufactured exclusively for Masonite by Timely., Fast-Frame. features a full 1" of adjustability to accommodate almost any variation in wall construction. This easy-to-install, user-friendly, kerfed steel door frame system is applicable to a full range of residential and commercial applications with wood or steel stud construction. Timely's expertise in innovating and manufacturing steel door frame components is second to none. Fast-Frame. is engineered to meet the most stringent code requirements including structural, impact and 90-minute fire ratings.

Outer Adjustable Closure

20-Gauge Steel
2 Uprights - 1 Header

TA-1 Adjustable T-Strike

1/4" of adjustment allows for ease of field installations for proper door closure

Standard Inswing Sill

Thermally broken - 5-5/8" width. Optional extenders for larger wall sizes.

Note: Not for use on outswing applications.

Handicap (ADA) Sill

Double Slope 4-9/16" & 6-9/16" width

Tile Face Sill

4-1/4" & 6-1/4" width
Note: Not for use on outswing applications.

Bumper Outswing Sill

4-9/16" width

Closure Span Adjustment Chart

Wall Sizes

4-1/2" - 5-1/2" = 1-7/8"
5-1/2" - 6-1/2" = 2-7/8"
6-1/2" - 7-1/2" = 3-7/8"

Wider sizes are available upon request.

Weatherstripping

Schlegal foam-filled compression (QEBD500)
90-minute fire rating

Primed White Galvanized Steel

Galvanized 20-gauge steel provides superior corrosion resistance, matches our Masonite HD bright white doors, and is an ideal surface for painting

Hinge Reinforcement

14-gauge, unique extruded holes provide the strength of a 12-gauge hinge reinforcement

Casing Options

Wood trim and brickmould can be easily applied to Fast-Frame, using nails or trim head screws without the need for custom millwork.

Fast-Frame Casings

TA-8 Standard Steel Casing

TA-30 Colonial Steel Casing

- ▶ TA-8 casings enhance any commercial or residential setting.
- ▶ It is recommended that TA-18 retainer clips be used for both casings.
- ▶ TA-30 casings add a special warmth for assisted living, motels, hotels, offices, apartments and homes.

Applications

- ▶ Multi-Family
- ▶ Assisted Living
- ▶ Motel/Hotel
- ▶ House to Garage
- ▶ Garage to Exterior

- ▶ Double door width is with a 'Z' astragal. If using a 5/8" astragal then add 9/16" to the width.
- ▶ All dimensions shown are for doors with standard inswing sill. Deduct 13/16" for bumper outswing or handicap compliant sill.
- ▶ Add 4" to height for 7'0" height.
- ▶ Add 16" to height for 8'0" height.
- ▶ Premdor spec slabs add 1/4" to height.

Fire Labels

Up to 90-Minute Fire Ratings available in single and double* configurations

*A 'Z' astragal and flush bolt are required for double fire ratings (sold separately)

Closure Test

In a 90-minute application, the door will close and latch from 18" if the following Fast-Frame components are used:

- ▶ QEBD500 Foam-Filled Compression Weatherstripping
- ▶ Factory Sweep
- ▶ Adjustable T-Strike
- ▶ Factory Supplied Sills
- ▶ Self-Closing Hinges

Structural Performance and Impact Rating

Design pressure ratings are available for compliance with national, state and local wind load and/or missile requirements. Product tested for structural and impact performance in accordance with TAS 201, 202 and 203. Product approval available under the Florida Department of Community Affairs (FL10357). Please note: Structural and Impact performance requires use of a hurricane grade 5/8" T-astragal for double doors.

Door Selection

Fast-Frame is available in either right- or left-hand inswing or outswing and is for use with any Masonite steel entry door.

FAST-FRAME ROUGH OPENINGS

ENERGY STAR_® is a program developed by the U.S. Environmental Protection Agency and the U.S. Department of Energy. The goal of the program is to protect the environment and save you money by encouraging energy efficient products, services and practices. To that end, Masonite is proud to produce a wide variety of door and glass combinations that ensure our products can be used as part of an ENERGY STAR_®-qualified assembled door system. Masonite doors and sidelites include a premium polyurethane foam core that insulates up to five times better than wood. Our triple-pane decorative

glass with coming creates an excellent insulator against the cold in the winter and the heat of summer. A properly installed ENERGY STAR_®-qualified door system can save you money all year. Our NFRC certified door systems may qualify for the ENERGY STAR_® program. Although other criteria exist for eligibility, including U-Factor and Solar Heat Gain Coefficients, use the charts below as a general guideline for which Masonite products may qualify.

For further information, see our website at:

www.masonite.com

- 1. U-Factor:** Measures the rate of heat transfer through a product. It considers all elements of an assembly including conductivity, air flow and glass emissivity. A lower U-Factor indicates a better-insulating product.
- 2. SHGC (Solar Heat Gain Coefficient):** Measures the amount of energy that passes through glass from the sun, creating additional heat. The lower the SHGC, the better it blocks solar heat.

Masonite, ENERGY STAR_® Compliant Products

NZ Northern Zones only

MASONITE GLASS

More Light. More Comfort. Less Energy.

As the leader in both innovation and trend, Masonite has invested in new state-of-the-art automated high-speed warm edge spacer assembly lines that put Masonite Glass at the forefront of the door lite industry.

Warm-edge flexible spacers have been shown to have up to nine times the life expectancy of traditional metal insulating glass systems available on the market today. They expand and contract and always return to their original shape, protecting against stress cracks that can lead to seal failure.

WARM-EDGE FLEXIBLE SPACERS
= LESS SEAL FAILURES

Warm-Edge Flexible Spacer
Flexible spacers can move as glass bows inward or outward, resulting in a reduction of seal failures when compared to metal spacers.

VS.

FULL-METAL SPACERS

Full-Metal Spacer
Metal spacers are rigid and seal stress can result in seal failure

SPACER SYSTEM	CONDENSATION RESISTANCE	EDGE OF GLASS TEMPERATURE	EFFECTIVE THERMAL CONDUCTIVITY	TOTAL IGU FACTOR
Warm-Edge Flexible Spacer	43.9	38.1°F / 3.39°C	0.182 W/m•C	0.265
Stainless Steel U-channel / butyl	38	35.1°F / 1.72°C	0.333 W/m•C	0.269
Stainless box / PIB primary sealant	36	33.6°F / 0.89°C	0.365 W/m•C	0.271
Tin U-channel / butyl	27.3	29.5°F / -1.39°C	0.806 W/m•C	0.278
Aluminum spacer / Silicone	19.6	23.7°F / -4.61°C	1.623 W/m•C	0.296

Simulations were completed using WINDOW 7.4 / THERM 7.4 as per NFRC 200-2014. Outside temperature 0°F, inside temperature 70°F.

PERFORMANCE BENEFITS

OVER OTHER SPACERS

CLEARER VIEWING

Warm-Edge Flexible Spacers

All-foam design dramatically reduces interior condensation, delivering a clear view in warm-edge technology.

Less-Metal Spacer

Mid-performance spacer systems that still contain metal improve condensation resistance.

Full-Metal Spacer

With conventional metal spacers, condensation is a fact of life.

SOUND REDUCING

Improved sound absorption over traditional metal spacers; warm-edge flexible spacers are a huge help in keeping the decibels down.

LONGER LASTING

Warm-Edge Flexible Spacers

Warm-edge flexible spacers feature a unique no-metal composite-laminating technology that provides superior durability and thermal performance in insulating glass units.

ENERGY SAVING

The thermal performance of a window plays a major role in household energy conservation. A high-performance window system will keep your energy costs low by reducing heat loss in the winter and heat gain in the summer.

	6'0"	8'0"	74"	97-1/2"	74-3/4"	98"	76-1/2"	98-3/4"

Many transom shapes exist. Please see Masonite's glass price guide for a complete list with full dimensions.

All dimensions shown are for inswing doors. Deduct 1-1/8" from the actual door unit size, the rough opening size and the outside brickmould size height for outswing. For handicap accessible doors, see product selection detailed in the catalog to determine if the entry door style you have selected is available. Recommended rough openings for the FAST-FRAME, adjustable steel frame offering are different than the dimensions shown in this chart (see rough opening chart titled FAST-FRAME).

Floor covering can affect rough opening heights. *Height dimensions shown are for 79" and 95" tall doors with 1-3/8" sills. For variations, adjust accordingly.

How to Measure Your Door

STEPS 1 & 2

There is no 'industry standard' for door sizing, so follow these steps carefully. Measuring your door and determining your door handing is very important to ensure the best fit for your opening. For best results, have a professional measure your opening and get it installed.

STEP 1. Measure the width of your existing door slab.

This is the edge of one side of the door slab to the edge of the other side of the door slab. (A)

STEP 2. Measure the height of your existing door slab.

This is the top edge of the door slab to the bottom edge of the door slab. Do not include the sweep on the bottom of the door. (B)

STEP 3. Measure the jamb depth of your existing door.

This is the inside edge of the door jamb to the outside edge of the door jamb (area where hinges are). Do not include any trim in this measurement.

STEP 4. Determine the handing of your existing door.

- A) All handing must be done from the exterior of the door. Looking at your door from the outside, your door swings:
- ☐ A - Into the house (inswing)
☐ B - Out of the house (outswing)
- B) Looking at your door from the outside, your door knob is:
- ☐ A - On the left side of the door
☐ B - On the right side of the door
- C) Select the combination below to determine the proper handing of your door.
- ☐ AA - Right-Hand Inswing
☐ AB - Left-Hand Inswing
☐ BA - Left-Hand Outswing
☐ BB - Right-Hand Outswing

STEP 5. Final calculations of your existing door.

To find the estimated size of your existing unit, use the calculations below.

WIDTH	FOR INSWING UNITS	FOR OUTSWING UNITS
Measurement A		
Add for Jamb	1-3/4"	1-3/4"
Total Unit Width		
HEIGHT		
Measurement B		
Add for Head & Sill	2-1/2"	1-5/8"
Total Unit Height

Fire-Rated / ADA / STC

COMPLIANT EXTERIOR DOORS

MASONITE

FIRE-RATED

► Belleville® Oak Textured Flush Door / Door BLT-X

- Whether or not codes require fire-rated entry, enjoy the peace of mind that comes with knowing your home is more protected.
- Masonite offers 20- and 90-minute fire doors with the same on-trend architectural characteristics of our steel portfolio.
- Masonite runs extensive testing at the R&D center to ensure the most stringent fire-rated building codes are met.
- 20- or 90-minute fire-rating must be specified when ordering.

MASONITE

ADA

► VistaGrande® Smooth Flush-Glazed Door with Clear Glass / Doors VSG-810-010-X

- Masonite is proud to offer several door designs with 10" bottom rails.
- Complying with ADA (American Disabilities Act) standards, the offerings are available in a number of steel and fiberglass designs to suit many styles of architecture.
- Masonite is continually creating new and innovative products that make every home more valuable and more enjoyable.
- Doors indicated as ADA eligible must be installed with ADA thresholds and ADA compliant hardware.

MASONITE STC

► VistaGrande. Smooth Flush-Glazed Door with Clear Glass and Applied Prairie SDL Bars
Doors VSG-122-010-S09P-X

- Managing and containing sound transmission is becoming more popular in both residential and commercial construction.
- Doors can be an important component when attempting to reduce the noise that is either entering or exiting a room or building.
- STC (Sound Transmission Class) are measurements of a door's ability to reduce the transmission of airborne noise. Higher STC values represent better noise reduction.
- Acoustical performance based on wood frames and 5/8" compression weatherstrip.
- STC determined in accordance with ASTM E90.

Acoustical Performance

MASONITE GLASS

More Light. More Comfort. Less Energy.

As the leader in both innovation and trend, Masonite has invested in game-changing new automated, high-speed glass assembly lines with warm-edge flexible spacers that put Masonite Glass at the forefront of the door lite industry.

As consumer demand for bringing the outdoors in continues to grow, so does demand for higher-performing door lites. Warm-edge flexible spacers provide superior energy performance and reduced sound transmission, resulting in a more comfortable home. With a reduction in condensation, people will be able to see more clearly and enjoy the view at all times. The combination of automation and spacer performance guarantees nothing but the highest quality, meaning our products will last longer.

Discover the many benefits of our higher performing standard glass inserts on page 214.
